BOOBALAN V

Software Developer | Full-Stack Developer

Chennai, Tamil Nadu, India | +91 9025006329 | boobalanvaithiyanathan1@gmail.com
LinkedIn: Boobalan V. | GitHub: boobalanIT | Portfolio: alanz-tech.netlify.app

PROFESSIONAL SUMMARY

Software Developer with nearly 2 years of professional experience developing and maintaining web applications, working with APIs and databases, and supporting application deployments. Experienced in Angular, Node.js, NestJS, PHP, PostgreSQL, and MongoDB. Contributed to an AI-powered business intelligence platform featuring conversational data analysis, Model Context Protocol (MCP) tools, and user-requested report and dashboard generation. Hands-on experience with SQL database objects, Nginx, Apache, and GitLab CI/CD.

TECHNICAL SKILLS

Frontend: Angular, HTML5, CSS3, JavaScript, Bootstrap

Backend: Node.js, NestJS, Express.js, PHP, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

Web Servers & Deployment: Nginx, Apache, Application Deployment

Tools & CI/CD: Git, GitLab CI/CD, Postman, pgAdmin

AI & Integration: Open-source LLM integration, Model Context Protocol (MCP), AI-powered chatbot integration

PROFESSIONAL EXPERIENCE

Megam Technologies — **December 2024 – Present**
Software Developer | Chennai, India

Datalytics — Business Intelligence & Analytics Platform

- Developed and maintained features for a business intelligence platform, including MCP server tools that enable AI-assisted interaction with platform data and functionality.
- Integrated an open-source large language model (LLM) to support natural-language questions about business data and provide responses based on analytics information.
- Implemented functionality to generate reports and dashboards from user requests, covering operational metrics such as working hours, time spent, and issues created or closed.
- Supported comparative analysis of employee work activity and time allocation, alongside bug fixing, feature enhancements, and application maintenance.

ERP — Enterprise Resource Planning Application

- Developed and maintained ERP application features using PHP and PostgreSQL; implemented CRUD operations and integrated application functionality with existing database and system workflows.
- Created and modified SQL queries, views, materialized views, functions, and triggers to support business requirements; troubleshot application and database issues and implemented fixes.

Deployment & Development Operations

- Configured Nginx and Apache web servers to host and serve web applications; supported application deployment, server-side configuration, and environment setup.
- Worked with GitLab CI/CD pipelines to support application build and deployment workflows; used Git for version control and Postman for API testing and troubleshooting.

Shiash Info Solutions Private Limited — **March 2023 – May 2023**
Junior Full-Stack Developer | Chennai, India

- Contributed to full-stack web development tasks using HTML, CSS, and JavaScript; assisted with feature implementation and debugging within an established software development team and workflow.

PERSONAL PROJECTS

KYAAT — Gesture-Controlled Mouse — *Python, OpenCV*
Developed a computer-vision tool using Python and OpenCV to recognize real-time hand movements and translate gestures into mouse cursor interactions with sub-20ms response latency.

Personal Portfolio — *Web Development*
Designed and built a fully responsive personal portfolio website to showcase technical skills, live project demonstrations, and professional experience.
